

DEAD MAN'S HILL—In the area here pictured half a million men are said to have been killed. The photograph was made in two sections and the trench lines matched. The tiny dots, scarcely visible in the landscape, are craters formed by shell explosions. Toward the north, indicated by the arrow, lie the main lines of German defences.

Paul Thompson

CUMIERES. Three aero studies made at varying heights of the French, intrenched as the photograph shows after that the buildings were replaced by gaping

## THE CAMERA THE EYES OF THE MODERN ARMY.

These remarkable aero photographs, published exclusively from a height a little less than a mile—just out of the War Office cartographers. Upon them depend

AS DEADLY AS IT LOOKS—A French reconnoitring aeroplane, with two machine guns joined in a turret behind the pilot. These machines do not seek fight, but are ready for defence when attacked.

## WHAT THE GERMAN AEROS DID.

All that was left of a village south of Verdun after German bomb droppers had launched a rain of explosives from the sky. Houses were burning as the photograph was taken.
